DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5 – 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Prior art reference 7-30051.

Japanese prior art document 7-30051 submitted by the Applicant discloses a first semiconductor element 43B with a first plurality of electrodes and a second semiconductor element 43A with a second plurality of electrodes. The first plurality of electrodes are connected to a leadframe by bumps. The second plurality of electrodes are connected by wires. The leadframe has outer lead portions 48 and inner lead portions 60B. The outer lead portions are thicker and wider than the inner lead portions.

Allowable Subject Matter

Claims 1 – 4 are allowed.

Claims 8 – 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
